News in the digital age has repented faster, so it's not surprising that more and more consumers are getting their news on their phones rather than on their TVs. And while aggregators like Press and Newsstand have their place, today we'll see how we get the news from the source. These are the best apps from professional news organizations, at least from the humble opinions of Android Central staff. One word before we get to the apps themselves for so-called push notifications. While almost all of these apps will ask you for push notification permission at first use, anyone who has used them can testify to how prevalent and in many cases repetitive or useless they can be. Unless you're working in news or in an adjacent news box, we recommend using one and only one news app for breaking news type push notifications. You should choose either your personal favorite news app or the news app with the size (or control) of push notifications to your liking the most. And now, to the daily news... The BBC is one of the most used news apps in the world and that may be because the BBC is a global name in the news, but also because they have a bit of an app with a few bells and whistles. The homepage is like a giant tower of rotating articles: each section gets a row and then pulls it around looking for one that interests you. You can customize the sound for push notifications, and you can specify whether the app can be updated in the background and if you want to be notified when it does. However, you can't ask if it's just WiFi updates and not using your valuable mobile data, so I prefer the nice big update button in the top bar. Huffington Post This is a liberal-leaning source, but hell if their application is not almost perfect. The Huffington Post will let you in, but it's not intrusive about it if you don't want to. You can have your own custom edition and easily change them in different editions around the world. You can change fonts to your liking, just like everyone else, but do you know what the Huffington Post does is special? There's a dark mode. And not only one, there are two: there is dark and there is a night. Even better, you can trigger night mode automatically based on the ambient light sensor so that it changes based on your environment. It makes me want to cheer up; it's so rare and wonderful to find a news app that doesn't want to dazzle its readers with tons of white. Beyond the dark, HuffPo has a few other fun things. You can customize push notifications with a specific ringtone and decide whether to vibrate or not. It can automatically download articles at a space of your choice and can only be downloaded via Wifi for users who are concerned about data. ABC News ABC News is another rare news app dark theme and there's something even rarer: Chromecast support. You can stream video segments directly from the app to your TV, allowing you to get closer A little dream for you just throw custom playlists like your news. ABC has adaptive quiet mode, assuming you enable notifications about it, and also allows location-based notifications for more localized results for your region's specific news. ABC News often has one or more live streams, which is especially good for listening to things like press conferences or breaking news while away from home or in an incredibly noisy newsroom. You can also re-watch sections of popular ABC news programs like World News and This Week. The app also gives you a day back at any point on the day you prefer. If you're someone who stands up and checks the news, you can have the daily rewind to give you a version of yesterday's and last night's headlines. Or the daily rewind can be drawn up in the evening to defuse them before bedtime. AP Mobile AP app is simple, but it works. No night theme, only on/off switch for notifications, and basic slider for font size adjustments, but gets the clip job. AP, The Associated Press, is one of the news sources most other news organizations subscribe to, and the lucky thing about it is that with the help of the AP app, you can get this news faster in some cases, especially if you head to the press releases section. Be meaningful, though, the press release section doesn't have a real filter, so you may need to sift through entertainment and sports releases while searching for press releases. You can also report news to AP through the app if you're someone who does such things. USA Today This app is another application with a lot of white, but not without its merits. USA Today layout is big, which is not a bad thing with all the wonderful photos, but it means it will scroll more than on a more condensed layout. Sections and subsections are done well and easy to navigate, but the settings leave something to be desired. Offline reading for the USA Today app is also a little different, as you need to select it from the drop-down menu and then manually start downloading while still on Wifi for later reading, so if you forgot to sync before heading to your train, you're SOL. The Guardian app it's almost offensive white, but the design elements, animations and liquid nature of the app almost make up for it. The Guardian manages to separate some of the whites with colourful blocks, especially bright red boxes with live dishes. There's usually one in the news section and one in the sports section, and they're one of the best liveblogs I've seen done in a mobile app so far. Like the BBC, you can update automatically, but you can't indicate if it's only updated over Wifi. If you have a premium account, you can unlock more content, including crosswords, which some say are the most important part of And since it's digital, you'll never have to worry about doing it in a pen. The Guardian also has a slight one-off impact on its competition, such as Android Wear app so you can get news on your wrist. The New York Times The New York Times is one of the country's premier newspapers and as such has a superiority to its content. NYT subscriptions can run from \$14.99 a month to \$34.99 a month, and while most of us just can't afford to pay that for a news app, the Times is worth a lot, and for the price you pay, you get a decent app. You only have background sync settings over Wi-Fi and you have a night mode (huzzah). Navigating the sections in the app can be a little annoying if for any reason other than the list of sections is massive, but unless you spend many times blogging, you should be fine. What's the news? Where are you going to get 411 what's going on in the world? Are you a reader or an observer? Are you reading the news? If not, you really need to get started and there are plenty of apps here to help you get electricity on all the latest news of the day. Source: Marco Miranda Our phones are pocket supercomputers with professional-grade cameras and battery for days, but without the best Android apps to take advantage of it, what would be the point? There are millions of millions of Android apps that transform our phones from shiny glass plates into performance electric houses, and over the past year these are the apps that have seized the day and made our lives easier, faster and better. So now that you have one of the best Android phones of the year, make sure you download all of the best Android apps. Source: Nick Sutrich /Android Central Who needs a personal assistant when you have services like Google Assistant and Amazon Alexa available wherever you go? These types of apps are designed to help relieve the stress and pressure of your daily life to make things easier. From automation to smart home manufacturing products and everything in between, these apps allow you to get the job done with some help. From assistant routines in Google Clock to expanding assistant-compatible smart home devices to overhauling visual responses, this is a busy year for

Google Assistant. It feels like a century ago when Android Auto added google assistant, but this simple addition made millions of drivers safer, especially during the long, frustrating holiday drives. Free in Google Play Tasker a little in previous years, but since the new owner João Dias - maker of autoApps plugin package and the most thirsty fan of Tasker - took over, the automation app has seen an overhaul of the user interface and major updates. With TaskerNet and improved export/import, it's never been easier to share, tweak, and create amazing profiles and tasks for Android (and beyond). \$3.49 on Google Play Amazon is no longer mostly the highest place to go just for your online needs as the company continues to expand its reach into the world. With Alexa, you get a custom assistant in your pocket, along with echo device integration and the ability to stay connected wherever you go. Go. can even call or send messages to other Alexa-supporting devices without paying 10¢. For free on Google Play Do you ever want to know the type of flower you see while on a hike? With Google Lens, you can find out quickly by holding your camera to the flower. The lens will even translate foreign languages or save contact business cards faster than ever. Free on Google Play IFTTT lets you create different automated systems between apps and services that are no longer available. With more than 630 different integrations, you can create your own recipe and get a warning when this item on Amazon's wish list is finally sold, for example. If you don't want to create your own, there's a community and a library of different recipes to choose from and set up. Free on Google Play Whether you need to control lights, smart plugs, thermostats or assistants/displays from bed heat or the furthest corners of the world, the new home view in the Google Home app makes it easy. The ability to add home users to use what you've already set up is a huge step forward to make smart homes more accessible to all skill levels. Free on Google Play Best Keyboard Apps Source: Android Central The keyboard on your smartphone is one of the most used apps daily. This is the first thing that should appear when your friend sends you a message if you need to reply to an email, or if you just need to get your thoughts. But best of all, there's a keyboard app that works for everyone, regardless of what's basic, or if you want to go to the extremes of customization. Gboard's keyboard continues to dominate the market with an ever-expanding set of features on Android, iOS and soon chromebooks. Some of this year's additions, which include options such as making emoji packs or gifs, may seem trivial, but Gboard has also added support for dozens of new languages, as well as the latest floating keyboard mode that makes filling out forms a breeze. Free on Google Play Instead of dealing with the main themes of the keyboard stock exchange, Chroma gives you a keyboard with so many customization options that your head will spin. This is in addition to smart AI's involvement to provide significantly improved contextual forecasts compared to competition. You will also get the extra benefits of gestures you already know and love. Free w/IAP on Google Play SwiftKey crawls on four million download per mile tag and for good reason; this custom keyboard gives you complete control. The app itself sports more than 100 different themes and you can even create your own theme with a picture that you've taken or downloaded as a background. SwiftKey also includes support for more than languages and you can activate up to five different languages at once. Free on Google Play Many keyboard apps just focus on whether your spelling is wrong. Grammarly takes things to the next level with smart predictions and even even ability to choose from synonyms if you want to sound fancy. Not only can you expand your vocabulary, but your writing will also sound professional. Free w/IAP on Google Play Best browsers Source: Android Central While the Google app makes it an easy quick search thing, your mobile browser does a lot of heavy lifting. Some of these mobile browsers have become so powerful that you can install extensions, while others provide as private browsing as possible. And hey, one of our predictions even gives users the ability to make a little dough while browsing. While ads help keep lights on for some, they can be a real nuisance when you're just trying to check out the latest article. With a browser like Brave, you're guaranteed to get the best Adblock browser while getting fast and secure browsing. There is also the added benefit of Brave paying you to surf the internet at your pace and how you want to. Free w/ads in the Google Play Samsung browser finally made its Play Store debut a few years ago and is much stronger than almost anything you'll find. In addition to built-in privacy features, Samsung allows you to download third-party apps that act as extensions. And if you already have a Samsung device and use this browser, you'll get even more features that aren't available elsewhere, such as Gear VR integration, and more. Free on Google Play Google Chrome is a de-facto choice for many and for good reason; it just works. Google works tirelessly to bring new features to the app, along with maintaining a fresh and crisp design. When you use Chrome, you'll get almost all the features like the app on your pc, including sync capabilities, so you can start to read something from your phone and pick it up from your computer. Free on Google Play Firefox is already a fan favorite for desktop browsing, so why not check your mobile browser? There's built-in tracking and blocking, improved privacy controls, and extensions to provide you with all the tools you need. Free on Google Play The best VPN apps Source: Harish Jonnalagadda/Virtual Private Networks for Android (VPN) are used for a number of reasons, including allowing you to hide your online identity. Another popular VPN use is to stream TV shows while traveling abroad. These apps are free, but there are subscriptions to keep in mind if you want to browse safely anywhere. With over 3,000 different servers in more than 90 countries, it's easy to see why ExpressVPN provides a great experience. It's easy to get started, and then all your web browsing is encrypted and you can browse safely. Once you have registered for the service, there is no limit to the number of which can be connected, and will even protect your text and instant messages. The free w/IAP on Google Play NordVPN is one of the best in the business as it handles your data. The data passes through the original server, and then the encrypted data on a second server for an additional layer of protection. Additionally, there are more than 5,000 servers distributed in more than 50 countries. Free w/IAP on Google Play Surfshark is characterized by speed and can be used with an unlimited number of servers at the same time. It'll be great for anything you'd like to do with your devices, but you won't be able to use Surfshark with streaming apps as it's outside U.S. Free w/IAP on Google Play With IPVanish, you'll be provided with a secure environment to browse the internet, watch videos and manage your accounts. The service provides access to different servers in 1,400 different countries, as well as 24-hour support. If you don't want to stick to this service, you have 30 days to change your mind. Free on Google Play The best file management apps: Andrew Myrick/Android Central Although many of us have changed the way we use our phones, there's one thing that's never going to change - we download a lot of things. I'm not just talking about apps, but also music files, documents, PDFs or even new wallpapers. It's important to keep your files organized to know where everything is or get rid of these stagnant memes. If you tend to download a boat load of files to your smartphone, you will need Simple File Manager Pro to organize them. This app offers an intuitive experience to access your master files while giving access to microSD cards or USB devices. In addition, there are many customization options to create a theme that meets your wishes. \$1.19 on Google Play Some want a simplified file manager, but for those who want something a little more complicated, X-Plore File Manager is perfect. This app has an old-fashioned Windows look and feel while giving you all the features you might want. You can even set up the app to access and manage files on your Android phone from your computer's web browser. Free w/IAP in Google Play Files by Google started as an experimental app, but has become a lightweight way to keep your storage from filling. With features like Smart Recommendations, Files will offer junk files that you can download and get rid of with ease. Free on Google Play Astro has been available on the Play Store for more than 10 years and it continues to be one of the best file management options. The app makes it easy to access your files, along with opening these annoying Zip and RAR files directly from your smartphone. You can also manage your cloud storage services directly from Astro, making it an all-in-one storage option. Free on Google Play Best Social Media Apps Source: Android Central Social Media Is An Obscure Sister. This can be a great source of news and information and a way to keep in touch with your friends, but it's also frustrating when the latest trends and memes clog your timelines. Fortunately, there are many different platforms to share your voice with a great community. I've been from third-party Reddit stalking for years, but this year the official Reddit app breeze past Relay, Boost, and the rest for the best app option. Reddit's new look on the website is a source of very small debate, but I rather enjoyed the new website that looks at the ongoing improvements to the Android app. If only r/Writing Prompts didn't suck up all my dinners... Free in the popularity of Google Play Instagram continues to increase and it seems that there is simply nothing that any contestant can do to stop it. This app is one of the best and easiest ways to share your favorite photos, whether you're tracking your life or simply editing goofy photos. You'll also get features like IGTV from some of your favorite creators, and the app makes it easy to find even more people/brands to follow. Free on Google Play Let's accept it. There are many Twitter apps in the play store, and while many of them are pretty good, none of them compete with Fenix 2. From multiple account support to a super-verbose silent shutdown system, Fenix 2 aims to be the best customer on Twitter. This doesn't even count the customization options that allow you to adjust your layout, while allowing you to make a theme that makes Twitter more enjoyable to use. \$4.99 on Google Play Just for everyone you know is on Snapchat and for good reason as it makes sharing your life easier than before. You'll get private messages, free cloud storage and a host of different ways to make your photos and videos absolutely perfect. Free w/ Ads on Google Play The best photographic apps Source: Andrew Martonik/Android Central After years of potato shots from mobile devices, we're finally at a point where our smartphones can take better photos than some DSLR cameras. The game store opens the door for many different apps to take, edit and save these photos, which in some of these wishes act as a digital memory bank. ProCam X unlocks the potential of what your smartphone's camera is capable of, which is quite a lot nowadays. The application enables control of various aspects of the image by providing professional controls such as ISO, white balance and even geotagging. With this app, you can even take RAW photos, which opens even better image editing after the fact. \$5 on Google Play Once you've taken a photo, chances are you'll want to edit it. With Adobe Lightroom, you can make easy edits or change things and edit like a pro, directly from your smartphone. Adobe even has a built-in camera for professionals so that Lightroom becomes your all-in-one solution for your from mobile photography. Free w/IAP on Google Play For those who are more interested in archiving their photos and less about pro-level editing, then the only real choice is Google Photos. The app itself gives users some basic photo editing capabilities, sometimes giving you stylized photos with what Google thinks your photo should look like. In addition, you will receive Albums, photo books, and can create shared albums in just seconds. Free on Google Play Our smartphone cameras are more powerful today than ever, and we're not just talking about taking photos. With an app like FiLMiC Pro, you can take professional videos to a level, and get full control over the editing process. Those who are already familiar with recording video on the DSLR will feel at home without having to get stuck around the camera bag. \$15 in Google Play Best Customization Apps Source: Joe Maring/Android Central The biggest benefit of Android, compared to competition, is the ability to customize almost any aesthetic aspect of your device. From the gadgets you use for how your app drawer looks, and even the settings menu, there's a way to customize everything. These are the best apps you can use to get the right look you want on your smartphone. If you told me at the beginning of the year that the starter iD use the most was a smart starter, I'd be laughing in your face. Then smart starter 5 arrived and I fell in love. Flexible-categorized app drawer is better than ever, and with the integration of Icon Pack Studio and unhealed widget system, the SL5 makes building and switching themes breeze. Free w/IAP on Google Play Lawnchair 2 gives you the feeling of starting pixels, with all the customizations you would find in other third-party launchers. There is support for Customizable icons, along with new features of the category drawers, and much more. You can use Lawnchair to create the most complex or basic start panel on your mobile device. Free on Google Play Big Brother of Kustom Gadget creator KWGT, Kustom live wallpapers on a one-stop drive has grown significantly on me this year. While the s-5 without grid widgets are nice, nothing beats the point, edge-to-end widget and item placement in KLWP. Formulas and menus can be daunting, but a stable KLWP community, especially on Reddit, helps you make any topic possible. Free/\$4.49 on Google Play It can be frustrating when you've found an icon pack you love, but there are several apps not included. Of course, you can apply to the developer and wait for the update to come, but there is a better solution. With Icon Pack Studio, you can create your own icon pack while customizing each icon to your liking and will work with almost any third-party starter. Free or \$4.49 (Pro) on Google Play Changing wallpapers is fun as we've been able to do it, and Tapet has been there with us for quite some time. With Tapet, you can either select wallpaper on your own or set the app to automatically generate a new one for you every hour or once a day. In addition, the app will automatically detect the resolution of the smartphone so that the wallpaper looks fresh and won't stain your home screen. Free w/IAP on Google Play Some of us don't have time or want to dive through the thousands of icon packs, but you just want it looks great. Whicons is not flashy (on the surface), but it works gives you a good-looking icon pack for your Android phone. There are more than 5,500 custom icons, along with included wallpapers to match, and support for the dynamic calendar icon so that your calendar shows the correct date. Free w/IAP on Google Play Source: Ara Wagoner/Android Central In addition to customizing your phone to your heart's content, you can take advantage of widgets to quickly absorb different bits of information. Whether you're just looking to see what the weather forecast looks like, or you need to see what's on the agenda for today, there's a widget for everything. Then other apps allow you to create your own widget with any piece of information you can think of. Best password managers Source: Joe Maring/Android Central Absolutely, in no case should you have a note on your smartphone with the listed passwords. Hackers are better than ever today and your personal information may be revealed more easily than you think. However, if you have a password manager, these passwords can be analyzed, and then you'll be informed if the password has been compromised. The app can then help you create a safe, secure and almost unbreakable password so that your information doesn't fall into the wrong hands. 1Password wasn't always the best option for the Play Store, but recent updates have lifted the ante and pushed it to the top of the leaderboards. The service gives you a short trial period before you need to sign up for a subscription. And your vaults will remain secure, enabling you to keep important personal information safe but on standby. Free w/IAP on Google Play LastPass does a fantastic job of keeping all your passwords safe and security, even if you want to stick to a free account. Then, there are premium options for one user or you can get your entire family protected with a specific plan. The service even offers security challenges that help keep your passwords up to date and secure and out of the hands of bad guys. Free w/IAP on Google Play When it comes to Dashlane, you'll get access to up to 50 passwords saved on one device with the free version, but Premium gives you even more. With the Premium subscription, users get access to a personalized VPN, along with credit monitoring and identity theft protection. That's all, except it's a great place to keep your passwords safe and make it easy to update them. Free w/IAP on Google Play Stop using the same password every time you create a new network login. Enpass is a simple password manager that works whether you're connected to the network or not, as data is stored on your device rather than company's servers. But you can easily sync all your passwords on your devices using popular cloud services like Dropbox, Google Drive, and more. Free w/IAP on Google Play best messaging apps Android Central Let's be real, messaging is the main way that just about everyone communicates. Thanks to various apps and services, it is much easier to shoot your mother text than to call her and sit on the phone for an hour or more. Not everything requires a phone call, and these messaging apps open the door to easier communication with friends, family, colleagues and more. It's a dark subject! Internet messages! This is a big year for Google's SMS app and while I still miss Mood Messenger and Tetra themes, for the only third-party SMS app that can compete with Messages for the web is Pulse's paid sms-sync service, which is compatible with more platforms and browsers. A message theme may be missing, but the dark theme is a welcome addition. Free on Google Play Android Central has been in place for years because Slack is one of the best chat apps on the market today, both for business or personal purposes. Threads allow us to embark on minutiae without spam the main chat, and anyone can upload custom slackmoji for extra flair. All that needs a dark theme so as not to dazzle my bosses when I rotate them in 2.m. Free on Google Play SMS Organizer started as a fun project by the Microsoft Garage team, but has become one of the smartest apps you can download. While you can still send SMS and MMS messages, SMS Organizer generates automatic reminders from your conversations, and even makes it easy to pay your friend back for dinner, straight from the app. You can even easily block spam messages, along with customizing notifications and setting specific ringtones for your contacts. Free on Google Play Telegram was already one of the fastest and most popular third-party messaging customers, but Telegram X came up with something. With the app's X version, interaction with the app is even faster and has even more features, along with an improved interface and multiple gestures to use. The free Google Play Discord is designed with gamers at heart, but more and more are switching to the messaging platform thanks to integrations and ease of use. You can quickly build a community of users with easy community management by setting up member roles and inviting links ready. Free on Google Play If end-to-end encryption is the name of the game, then Signal Private Messenger is the best choice. This service ensures that every message you send is secure, and you can even set the app to act as the default sms client on your Android device. You can even make audio and video calls that are guaranteed to stay private no matter what. Free on Google Play Best Weather Apps Source: Harish Jonnalagadda/Android Central No one wants to get caught up in a storm in inappropriate and it is important to know if you will need your coat or if it is a short time and sandals time. There are so many weather apps in the Play Store that it's quite hard to find a diamond in Fortunately, there are several apps that are self-contained from the package, offering something unique. AccuWeather is an easy proposition for a great weather app thanks to its MinuteCast functionality. This gives you the most up-to-date weather alerts to know if there is a surprise storm that you don't need to get caught in. Plus, the app includes your area's live radar that shows you where the nearest storm system is, so you can prepare. Free w/IAP on Google Play Weather can be annoying, so it's important to have an app that makes the weather forecast manageable. Today Time is distinguished by this attitude with its beautifully designed applications and access to any different bits of information you might want. It's also adaptive, so you can view or hide what you want to know and what you don't. Free w/IAP on Google Play instead of relying on an app to tell you when bad weather can be on your way, why not see it for yourself? RadarScope gives you a radar look at everything that's going on around you, with the latest updates on potential storm warnings from the National Weather Service. Free w/IAP on Google Play Yahoo Time has come a long way over the years and now sports a beautiful design that shows you all the information you need. You can track up to 20 cities at a time or play with interactive maps to see where the storm is expected to pass. Free w/ Ads on Google Play Best News Apps Source: Andrew Myrick/Android Central The world is moving at a faster pace than ever before and you don't want to miss this important news being talked about in the office. There are news applications from specialized sources, but the presence of an aggregator analyzes the non-essential news from the essentials. You can use an app that allows you to collect the news you're interested in from the sources you trust in a clean layout. Having a news app that sums up what's important to you while giving you an idea of what's happening in the rest of the world is important. Google News does this with quick access to the top five daily headlines and the About you tab so you can read the news you're interested in. Google has even turned on a Full Coverage feature that contains a list of sources and more for big stories. Free w/ads on Google Play Feedly are for those who want to have news apps that are personalized according to their interests in the world. The app makes it easy to organize your favorite sources with the power of RSS while integrating with other apps like IFTTT and Zapier. With the Discovery tab, you can browse different categories of news to catch up on different topics you wouldn't normally see. Free w/IAP on Google Play If you want to keep track of what's happening in your area, not necessarily the rest of the world, then SmartNews is perfect. The app provides a section that shows local news, giving you the necessary notifications and even a widget that you can throw on your home screen. Plus Plus Access some of the best news sources summarized in one place for quick access. Free w/ads on Google Play can be difficult to choose through prevailing news headlines from different sources. So why not use an application like Inoreader to pay attention only to the sources you know and trust? This RSS reader allows you to select personalized news so that you only get the news that interest you. Free on Google Play The best reading apps Source: Andrew Myrick/Android Central There's something special about holding a physical book in your hand and turning pages as you dive deeper and deeper into a story. On this day, however, you can have a whole library of books saved directly on your phone. Whether you want to read a book at lunchtime or catch up on a series of comics, these apps make it easy. Amazon's Kindle app is simply fantastic at giving users access to a library of books, magazines and more in their pockets. If you subscribe to Amazon Prime, the company gives members access to over 1,000 different titles for free. If you don't have time to read, there's a built-in sound narrative for many books. Free ads on Google Play Don't have time to sit down and read? Let Audible read you the audiobooks. The app gives recommendations based on your library and preferences, while providing its first audiobook for free after registration. Audible even allows users to earn \$20 in Amazon credit if they have completed three titles by March 3. What more do you want? Free on Google Play is good and dandy to read comics in boring e-books readers, but Comixology gives you all the comics you might want in a clean interface. There are over 100,000 comics, graphic novels, and manga to choose from and you can buy them directly in the app. Now you can start catching up on your favorite comic book series on the go. Free on Google Play While some e-book readers allow you to read books purchased directly through your app or in just one format, Lun + Reader is much more open. The application supports more than 10 different formats, including EPUB, HTML, and PDF. As the library grows, you can customize it and create collections using one app to read everything. Free w/IAP on Google Play The best sports apps Source: Andrew Myrick/Android Central Much of the world is consumed by your favorite sports, from football to the NFL and everything in between. Thanks to the choice of apps in the Play Store, you can keep track of them all. Whether you want to know if your best fantasy pick is early, or if you want to catch the highlights of last night's game, these apps make that possible. Gone are the days of needing separate apps to track your favorite sports. With Tanna, you can track a number of sports, stats and more without switching apps. You can even create a custom feed to follow certain teams, leagues, or even your favorite player. Free ads on ESPN's Google Play A leader in sport for more than 40 years and the company continues to bring the best sports content on the go. The app itself makes it easy to stream games from your favorite teams, along with giving you highlights in the West Coast game that you're asleep on. Free w/IAP on Google Play Yahoo Sports is one of the few sports apps that not only allow you to read the latest titles for your favorite team, but allows you to watch the games. If you missed the game, capture all the highlights in the central hub or play some fantasy pick-themed games if you want to have fun. With Yahoo Sports, you'll be able to follow all your favorite teams, along with the likes of MMA, boxing or competition. Free w/IAP on Google Play The best video streaming Apps Source: Ara Wagoner/Android Central Streaming Services are the way of the future and nowadays, there is a streaming service available to all. While the old sitcoms and movies are great, these streaming companies are pushing out new and original content that takes advantage of 4K HDR playback and tells some of the best stories. Others then give you a platform to make your own videos and share them with the world. Disney+ is the new kid on the streaming services block and is an extremely welcome addition to the arsenal. The app gives you quick access to your favorite Disney classics, along with new shows like Mandalorian for those who want more Star Wars in their lives. The app lets you create an account for anyone, and you can download titles directly to your device for easy offline viewing.
